Experience

Full Stack Developer

Live Projects that focused on specific tasks and technologies. Did development work that resulted in real-world technical and practical experience. Challenged to work as part of a team and to figure out new things that hadn't been previously learned. Utilized popular project management methodologies. Prepared for the actual experience of working on a dev team and the workflow processes. The Live Projects covered:
Integrating Python, C#, HTML, CSS, and SQL
Working with a team
Daily stand-ups
Code retrospective and sprint review
Working in Team Foundation Server
Checking in and pushing your code daily
